

Impacto de las políticas de control del tabaco en los fumadores de Uruguay

Boado Martinez, M., Rodriguez Sendoya, D., Fong, G.T., & Bianco, E.

Abstract

This research presents the conceptual framework and the results of ITC PES (International Tobacco Control Project Evaluation Survey) evaluations. The project conducts surveys in 22 countries, and has been evaluating the impact of tobacco control policies in Uruguay since 2006 (n=887 to 1411) on beliefs, propensity to stop smoking and quitting smoking.
