<u>Principal Investigator</u>	<u>E-mail</u>
Hong-Gwan Seo	Hongwan@ncc.re.kr

### **Terms and Conditions**

Wave 2 of the *ITC South Korea Survey* is coordinated and administered by UW.

Data collection and entry will be carried out by Gallup Korea, commissioned by UW.

NCC authorizes the International Tobacco Control Data Repository (**ITCDR**), operated by the ITC Project Data Management Centre (DMC) at the University of Waterloo, to house the Wave 2 *ITC South Korea Survey* data, and to manage access to the data by approved researchers according to the data sharing protocol described in the ITCDR Guidelines (<http://www.itcproject.org>).

NCC grants DMC co-ownership of the data including the non-exclusive right to reproduce and/or distribute the Wave 2 ITC South Korea Survey data to the ITC Principal Investigators in any requested medium. Two years after the date of issuance of cleaned data sets by the DMC, NCC grants DMC the non-exclusive right to provide subsets of the data to other approved researchers through the ITCDR Data Request Application process (<http://www.itcproject.org>), under the terms of the ITCDR Data Usage Agreement. NCC will be notified of all approvals to use the ITC South Korea Survey data.

As co-owners of the data, ITC Principal Investigators will abide by the terms of the ITCDR Data Usage Agreement, providing signed agreements to the DMC in order to share data internally with specified members of their research teams.

In all matters regarding access, DMC will clearly identify NCC as co-owners of the Wave 2 *ITC South Korea Survey* data, and will not alter the data in any way, other than as allowed by this agreement.

### **Communications and Collaboration**

Members of the South Korea team have the right to use the data to produce reports, presentations, articles for submission to professional journals, and other products that report on these data. As part of our collaborative approach, the ITC Investigator team must be notified of all intentions to use the data. As per the ITC Paper List Policy [http://www.itcproject.org/library/paperlist/paper\\_list](http://www.itcproject.org/library/paperlist/paper_list) all intentions to submit academic papers to peer-reviewed journals, presentations at scientific conferences or meetings, and reports, including reports presented to the Ministry or other government officials, must be approved by the ITC Administrative group. Proposals for studies using the data will be reviewed by the ITC Administrative group to reduce the possibility of unnecessary duplication of effort in the ITC Collaboration, and to ensure that authorship issues are addressed properly.

The ITC Investigator team will explore analyses that use the Wave 2 *ITC South Korea Survey* data **in comparison with data from other countries**. In such analyses, some countries that were not involved in the preparation of the paper will be acknowledged explicitly in the paper in this form: “and the ITC Project Collaboration” with a footnote that lists the countries and names of key investigator(s) for each of those countries.

In all papers that the ITC Investigator team may lead using specifically the Wave 2 *ITC Korea Survey* data, the Korea team members will be invited to be co-authors. In reciprocal fashion, in any papers or presentations that the

Korea team may lead using Wave 2 ITC Survey data, ITC Investigators will be invited to be co-authors.

Whenever publications, reports, abstracts, etc., including data from the *Wave 2 ITC Korea Survey* are submitted to conferences or journals, copies will also be submitted to the Roswell Park TTURC Administration Core and to the ITC Project Manager at the University of Waterloo, so that a complete record can be kept of the research findings for dissemination.

I have read and understand the conditions stated above.

### **Terms and Conditions**

Wave 3 of the *ITC South Korea Survey* is coordinated and administered by UW. Data collection and entry will be carried out by Gallup Korea, commissioned by UW. NCC authorizes the International Tobacco Control Data Repository (**ITCDR**), operated by the ITC Project Data Management Centre (DMC) at the University of Waterloo, to house the *Wave 3 ITC South Korea Survey* data, and to manage access to the data by approved researchers according to the data sharing protocol described in the **ITC Data Request Guidelines** (<http://www.itcproject.org/datarequ>).

NCC grants DMC co-ownership of the data including the non-exclusive right to reproduce and/or distribute the *Wave 3 ITC South Korea Survey* data to the ITC Principal Investigators in any requested medium, under the terms of the **ITC Internal Data Usage Agreement** (<http://www.itcproject.org/datarequ>). Two years after the date of issuance of cleaned data sets by the DMC, NCC grants DMC the non-exclusive right to provide subsets of the data to other approved researchers through the **ITC Data Request Application** process (<http://www.itcproject.org/datarequ>), and under the terms of the **ITC External Data Usage Agreement** (<http://www.itcproject.org/datarequ>). As co-owners of the *ITC Korea Survey* data, both NCC and DMC will notify each other of all requests to use the *ITC Korea Survey* data.

As co-owners of the data, ITC Principal Investigators will abide by the terms of the **Internal Data Usage Agreement** (<http://www.itcproject.org/datarequ>), providing signed agreements to the DMC in order to share data internally with specified members of their research teams.

In all matters regarding access, DMC will clearly identify NCC as co-owners of the *ITC South Korea Survey* data, and will not alter the data in any way, other than as allowed by this agreement.

### **Communications and Collaborations**

Members of the South Korea Team have the right to use the data to produce articles for submission to professional journals and other forms of dissemination that report on these data (e.g., reports and conference presentations). All parties to this agreement should note that, as part of our collaborative approach, all decisions about publications resulting from the ITC South Korea Project will begin with a process of consultation among all team members to inform the direction and scope of potential publications and other forms of dissemination, and to determine team members' roles and expected contributions to each proposed publication or other form of dissemination. This consultative process will apply to all manuscripts, publications, reports and presentations, etc., that use the ITC South Korea Project data, but will be exclusive of internal reports and internal non-conference presentations (where the term 'internal' is defined as being either within NCC or addressed only to policy-makers or organizations in South Korea, as deemed appropriate by the South Korea team).

Furthermore, the ITC Investigator team must be notified of all intentions to use the data. As per the ITC Paper List Policy ([http://www.itcproject.org/library/paperlist/paper\\_list](http://www.itcproject.org/library/paperlist/paper_list)) all intentions to submit academic papers to peer-reviewed journals, presentations at scientific conferences or meetings, and reports, including reports presented to the Ministry

or other government officials, must be cleared by a designated committee established to oversee the publication of papers. The dissemination clearance process will apply to all manuscripts, publications, reports and presentations, etc., that use the ITC South Korea Project data, but will be exclusive of internal reports and internal non-conference presentations (where the term `internal' is defined as being either within NCC or addressed only to policy-makers or organizations in South Korea, as deemed appropriate by the South Korea team).

The primary mandate of the publication review committee is to ensure that there is no substantial overlap in content between papers submitted for publication. The committee will also provide a mechanism for conveying any potentially helpful additional information to the authors (e.g., recent findings from other ITC countries that may have relevance for the publication under consideration). The **ITC Dissemination Proposal Form** ([http://www.itcproject.org/library/paperlist/itc\\_dissem](http://www.itcproject.org/library/paperlist/itc_dissem)) is available for members of the South Korea team to use to summarize their intentions for dissemination. It is expected that this committee will be composed of key investigators from the ITC South Korea Project. Proposals for studies using the data will be reviewed by the designated committee to reduce the possibility of unnecessary duplication of effort in the ITC Collaboration, to provide a mechanism for knowledge exchange, and to ensure that authorship issues are addressed properly.

For all papers that the ITC Principal Investigator team members may lead using data from the *ITC South Korea Survey - Wave 3*, the South Korea Team members will be invited to be co-authors. In reciprocal fashion, for any papers or presentations that the South Korea Team may lead using *ITC South Korea Survey - Wave 3* data, the relevant ITC Investigators will be invited to be co-authors. The South Korea Team will consult with Dr. Geoffrey Fong to identify the relevant ITC Investigators who would be appropriate to invite as co-authors. Members of the South Korea Team will adhere to the criteria for authorship on papers to be published in scientific journals, as outlined in the **ITC Authorship Policy** (<http://www.itcproject.org/library/paperlist/authorship~3>).

The ITC Investigator team will explore analyses that use *ITC South Korea Survey* data **in comparison with data from other countries**. In such analyses, some countries that were not involved in the preparation of the paper will be acknowledged explicitly in the paper in this form: "and the ITC Project Collaboration" with a footnote that lists the countries and names of key investigator(s) for each of those countries.

Whenever publications, reports, abstracts, etc., including data from the Wave 3 *ITC Korea Survey* are submitted to conferences or journals, copies will also be submitted to the Roswell Park TTURC Administration Core and to the ITC Project Manager at the University of Waterloo, so that a complete record can be kept of the research findings for dissemination.

I have read and understand the conditions stated above.
